**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claims 9, 20-25, 37-49, 54, 55, and 58 have been cancelled.

Applicant's request that non-elected claim 32 be reconsidered is persuasive because claim 32 depends from allowable claim 26. However, applicant's request that non-elected claims 41-45 also be reconsidered is not persuasive as the invention of claims 41-45 have not been examined and applicant's amendment of claim 41 appears to just incorporate the generic subject matter of the previous claim 1. The subject matter of the previous claim 1 was not allowable (see the previous office action).

2. The following is an examiner's statement of reasons for allowance: The reasons for the allowable subject matter can be found in the previous office action and will not be repeated here. It is noted that a foreign search report has indicated that the teaching of Johnson (US 2002/0123069 A1) was deemed to anticipate a number of claims in a corresponding foreign application. This examiner does not believe Johnson anticipates nor rendered obvious any of the allowed claims in this application. Johnson is drawn to a therapeutic compound screening assay

Art Unit: 1795

that relies on an electrochemical cell primarily to control the redox environment of the sample (see abstract and par. 0013). Although Johnson broadly suggests that an electrochemical detection scheme can be utilized as well (par. 0017), Johnson does not give any indication that the reversibility of an oxidation or reduction wave, the onset of oxidation, or the potential for an oxidation wave can be utilized for the screening. Furthermore, Johnson does not disclose nor render obvious the use of its physical-chemical profile in conjunction with a biological activity assay as set forth in any of the allowed independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KAJ K. OLSEN whose telephone number is (571)272-1344. The examiner can normally be reached on M-F 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam X. Nguyen can be reached on 571-272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
